# BESPOKE DESIGN PROCESS

*THERE'S A THEME FOR EVERY DREAM.*

Discover Bespoke's  
four unique themes  
that will give you  
an idea of how  
your bathroom design  
will come alive.

## *Subtle Perfection*

Inspired by the idea of 'less is more', our modern minimalist designs come with subtle visual elements, clear spaces and sophisticated shades of white, beige and black, evoking a decluttering and meditative bathroom experience.

## *Vintage Vibe*

Full of rich vintage elements influenced by an era where textures and tones mixed to create a warm sense of comfort, these bathrooms come with light colour tones and intricate detailing, reflecting a Royal, Imperial and Victorian charm.

## *Sanctuary*

A perfect match for those who frequent natural adventures and love to relax in the lap of nature, these bathroom designs immerse you in the natural world and give you your very own private sanctuary, with a personal spa oasis built into it of course.

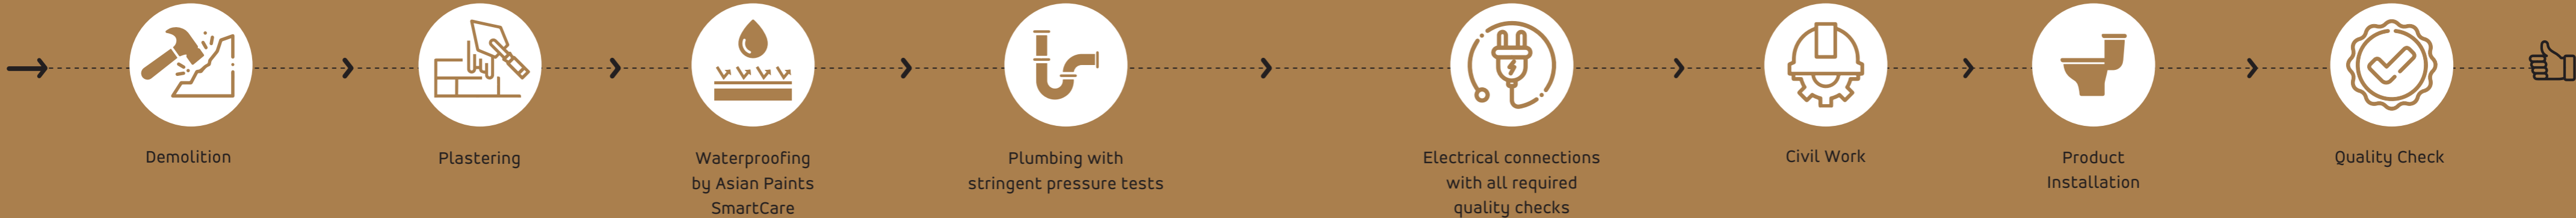

## *Urban Vogue*

A cosmopolitan blend of contemporary, modern and industrial influences, these designs are characterized by sleek geometric lines, neutral colour palettes and patterns that cleverly create continuity, giving you an opportunity to make an elegant statement.

# BESPOKE EXECUTION PROCESS

Step 1

# DEMOLITION

Total Time taken 5 Days

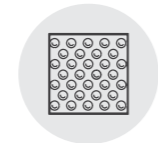

## Bespoke Benefits:

Mapping of columns and beams

Demolition with mechanized tools

Use of bubble wrap for floor protection in adjacent areas

Wrong demolition can cause damage to the existing structure and weaken your walls. This will further lead to extra time and cost.

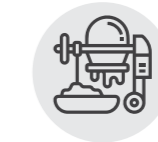

Step 2

# PLASTERING

Total Time taken 10 Days

## Bespoke Benefits:

Use of best ratio for cement and mortar to achieve strength

Stringent checks for verticality are conducted to support tiling

Maintained finish to support overall waterproofing and plumbing

Compromised plastering leads to weakening of demolished walls, verticality of walls and the waterproofing layer.

Step 3

## WATERPROOFING

Total Time taken 15 Days

### Bespoke Benefits:

Application of Membrane/WP layers

Technical check with moisture meter and 48 hrs water pond test

Up to 10 years\* warranty on waterproofing

\*Based on the choice of waterproofing by Asian Paints

Sub-standard waterproofing causes wall dampening and seepage issues in the bathroom, affecting non-adjacent and neighbouring walls.

Step 4

## PLUMBING

Total Time taken 18 Days

### Bespoke Benefits:

Use of branded noise insulation pipe systems

24 hrs pressure test to ensure leak-proof system

Minimum joints to ensure least pressure drop

Poor plumbing can lead to internal leakage and low water pressure, hampering the overall bathroom experience, not to mention fungus, due to stagnation of water.

Step 5

# ELECTRICAL CONNECTIONS

Total Time taken 19 Days

## Bespoke Benefits:

Multiple level of electrical connection checks conducted

Connections done keeping in mind future wiring provision

ISI certified switches and wires

A wrong or loose electrical connection can cause a short circuit and damage fuse connections. This can further damage equipment used inside the bathroom.

Step 6

# CIVIL WORK

Total Time taken 33 Days

## Bespoke Benefits:

Experienced and well qualified team for timely execution

Adherence to industry standard for civil work

Proper plastering and tiling to avoid seepage

Improper sloping, tile gaps and loose tiles cause water logging, seepage and other costly issues. The tile gaps can further lead to hollowness and bacteria formation.

## Step 7

# PRODUCT INSTALLATION

Total Time taken 38 Days

## Bespoke Benefits:

Best-in-class products from Asian Paints and industry renowned brands

No leakage and wastage

Up to 25 years\* warranty on products

\*Based on the choice of products

Bad quality products and their incorrect installation can lead to water wastage, compromise on ergonomics and drastically affect the overall bathroom experience.

## Step 8

# QUALITY CHECK

Total Time taken 40 Days

## Bespoke Benefits:

All processes checked and signed off

All products checked and signed off

1 year full bathroom service and product warranties covered

Lack of repeated quality checks and no after sales service lead to added costs and a bad post-delivery experience.

# BATHSENSE BESPOKE IN A NUTSHELL

## 1 *One stop solution for all your bathroom needs*

We take care of everything – from getting you the design best suited to your needs to executing it perfectly. Once you have finalized your design you just need to sit back and watch your dream bathroom come to life.

## 3 *Quality assurance*

When it comes to products and services, we truly are a class apart. We use the best-in-class faucets and sanitary ware from the house of Asian Paints. With a professional team of installers, waterproofing from Asian Paints and technical checks at every level, we deliver, flawlessly executed bathrooms.

## 2 *Beautiful and thoughtful designs*

Right from ergonomically placed bathroom fittings to anti-skid tiles, grab-bars to vanities that take into account your storage needs, our bathroom designs are not only beautiful, but also thoughtful.

## 4 *No time and cost escalation*

We complete the work within committed timelines and budgets, and give you regular updates on the status of the work.

## BESPOKE SPEAK - CUSTOMER REVIEW

**Nishith Pandya**  
Chembur - Mumbai

“ The Bespoke team was very professional, everything was explained to me systematically, the team was available for me whenever I called or if I sent them a message I would get a prompt reply. I was presented with several design options and a beautiful 3D render of what my bathroom would look like. At every stage of the process I was given an estimated number of days for completion, and these estimates were more often than not met. The most comfortable aspect was that I had just one person to call, be it an electrical issue, plumbing issue, or if I wanted to change a few things, like the placement of plug points. ”
