2 inches Body Jet 4 units with 20 mm CSC

*Not applicable for Combination 3

THINGS TO KEEP IN MIND

Hot water temperature between 60 degrees to 65 degrees celsius

Cold water temperature between 10 degrees to 15 degrees celsius

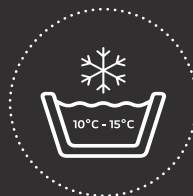

Temperature difference 50 degrees celsius

Pressure = 3 bar

Fine impurities like sand and metallic particles may disturb the function. Therefore, it is advised to drain the pipes to remove all the impurities before installing the body

It is advised to install at least 2 Y strainer in main supply line coming from overhead tank. Please make sure that Y strainer is placed, where it can be easily accessed for cleaning

The hot/cold inlet pressures have to be limited to 5 bar, with a difference of pressure between hot and cold not exceeding 2 bar
