MAINTENANCE GUIDE

Care and cleaning guideline for Bathsense Sanitaryware

Do's and Don'ts :

- Ceramic products should be cleaned regularly with warm soapy water. They may then be rinsed with clean water and, if desired, dried and polished with a soft cloth.
- In all hard water areas lime scale deposits can build up on the ceramic ware over time. We recommend the use of diluted lemon juice or vinegar to remove this. Apply, leave for a few minutes and rinse away with water.
- Do not pour strong chemicals on the ceramic sanitaryware such as bleach, ammonia, caustic soda, white spirit and sterilizing solutions. If this should accidentally happen, quickly wipe the spill away and rinse with plenty of water.
- Avoid dropping sharp objects onto the ceramic sanitaryware, as this may scratch or damage the surface.
- The plastic surface of seat covers should be cleaned regularly with warm soapy water. Abrasive cleaning agents or scouring powders may damage the plastic surface.
